

Sweeping without dusting!

for
fork-lifts
& wheel
loaders

TUCHEL-SWEEP
IDEAL 650

TUCHEL
MASCHINENBAU GmbH

Cleanness made to ideal measure!

The **IDEAL** road sweeper is in particular determined for industry and construction. It finds application in open areas, car parks and on building sites. Due to its dust-proof enclosure the Ideal road sweeper is the perfect machine to clean your halls. The uncomplicated attachment system makes it fit your fork-lift or wheel loader in no time at all. The very robust machine includes a debris collector with hydraulic tip and assures high durability.

The specific floating brush is the heart of the **IDEAL** sweeper. The special brush in V-shape sweeps both, sticky and fine dirt and thus ensures an excellent sweeping result. The internal hydraulic motor is protected against damage and three support-wheels are to follow the ground contours.

options

- water kit incl. 100 / 200 l tank and intermitting-pump for dust suppression
- fully adjustable hydraulic side brush
- heavy-duty wheels ø 250 x 80 for hard work
- road traffic equipment (prescribed to drive on public roads)
- separate hydraulic aggregate incl. oil tank
- extra colour shade

technical data		130	150	180	210
working width	cm	130	150	180	210
brush ø	mm	650	650	650	650
required oil flow	l/min.	25	25	25	30
hydr. operating pressure	bar	160	160	160	160
weight*	kg	455	479	516	556
fill capacity hopper	l	210	240	290	335

* incl. fork-lift attachment

Measurements and weights are approx. and non-binding.

hitch systems

- fully floating hitch system (3D) for pallet tines
- combined fully floating hitch system (3D) for pallet tines and wheeled loaders

Hitch system with 3D levelling (standard)

Hopper incl. hydraulic tip (standard)

Brush adjusting lever facilitates brush adjustment

Special V-brush for sticky and fine dirt
