# Speedy snow clearing!

The stiff snow plough **SK**, incl. vulkollan rubber wear lip is appropriate in particular for clearing snow in the communal sector. The overrun protection makes the plough fold automatically, if it hits a barricade and thus protects it against any damage. With its various working widths it enables the user to clear walkways, small feeder roads and car parks very rapidly. Strong wheels instead of having skis are to avoid scraping on road carpets. Various hitch systems are to ensure an excellent adaptation to your carrier-vehicle. Basic equipment incl. mechanical angling to the left and right.

technical data		150	180	200	225
total width	cm	150	180	200	225
clearing width (in straight & angled position)	cm	150/ 132	180/ 159	200/ 176	225/ 198
weight*	kg	186	213	223	235
height	cm	70			
angling	degree	up to 30			

\* without hitch system

Measurements and weights are approx. and non-binding.

## options

- hydraulic angling (1 additional double-acting hydraulic drive circuit required); on demand incl. pressure limit valve
- extra stable, reinforced wheels (ø 200 x 50 mm)
- road traffic equipment (warning flags & -holders, side-marker lamps LED)
- colour option

## hitch systems

- Three-point linkage
- A-frame
- Attachment plate for communal vehicles
- Fork-tine attachment
- Yard loader-/ wheel loader hitch incl. levelling (for small wheel loaders)

## The main features at a glance:

- interceptors on both sides included in standard equipment
- optimum angle of inclination of the clearing lip, for perfect snow clearing
- edge bending (side and top) ensures high stability of the snow blade
